London, W.1.
England

Dear Dr. Laing:

I'm afraid there is nothing that I can send you at the present time. I shall however put your name on our mailing list and hope to receive reprints from you.

The matter of films is peculiarly difficult as these exist in single copies and are not cleared for distribution. I wish we could get together and talk about some of these problems.

Our next development is a preliminary study of levels of learning in octopus with general idea that any entity of sufficient complexity however unlike man must face the problem of the logical types. I will let you know how this develops.

Yours sincerely,

Gregory Bateson, M. A.
